

JUMBO PRO CLASSIC WINDOW CLEANING LADDER

Window cleaning ladder in robust quality for the professional window cleaner. Made of aluminum - with a very stable and strong special profile.

The ladder is module-based and is available in 3 sets (9, 14 and 19 steps), which are combined by the 3 modules: bottom section, middle section and top section. The window cleaning ladder is easily and quickly assembled and disassembled without use of tools. This makes it very flexible and suitable for transport on a busy working day.

The 8 cm deep, angled steps provide better ergonomics, as you get a large, flat and comfortable standing surface. The steps are anodized, so there will be no black hands due to aluminium abrasion!

Module-based ladder with strong assembly brackets. Assembled without tools.

Equipped with practical top castors and shock-absorbing rubber block on the tip.

100 cm wide base stabiliser provides extra stability and safety during work.

The sections can be bought individually.
